

Bin 2 Bin Scheme

Terms & Conditions

Luxus

Cleaned Bins

All residual waste must be removed from the bins & kerbside boxes. All bins & kerbside boxes must be suitably cleaned and all labels removed.

Bins not cleaned will be subject to an additional cleaning charge, currently £1.50 per bin. (See [Bin Cleanliness Leaflet](#))

Remove Wheels and Stack

All bins must have the wheels and axles removed and be stacked to maximise the number of bins per vehicle. The ideal is 8 - 10 bins per stack for transportation.

NB. The wheels and axle for the bottom bin of each stack must be left on for transportation and lids do not need to be removed.

Bins & Boxes Accepted

High Density Polyethylene (HDPE) residential and industrial wheeled bins from all manufacturers and HDPE dustbins. All HDPE and PP kerbside collection boxes from all manufacturers. Please separate different plastic types where possible.

NB. No metal bins or compressed rubber dustbin lids will be accepted. Industrial bins must have metal hinges and Nylon handles removed.

Collection

Luxus will arrange collection of bins and boxes for return to Luxus from one location per load. Each supplier requesting collection is responsible for transportation of all bins to that single location. Transport will normally be free of charge providing that load is greater than 2.5 metric tonnes in weight. Luxus will pay for cleaned wheeled bins delivered to our recycling centre by arrangement.

The following may incur additional charges:

- Multi point collections
- Timed collections
- Special vehicle requirements

Loading

Each supplier is responsible for the loading of the wheeled bins and kerbside boxes to the collecting vehicles.

Hazardous Waste

Luxus will not accept any bins or boxes contaminated with hazardous waste or significant amounts of household waste.

Any bins or boxes received with any such contaminants will be dealt with by a hazardous waste contractor. Disposal and legal compliance costs will be charged to the supplier at fault.

don't compromise
